14 - STAIN, HANDRAIL

Wood can vary in color and pore structure even within the same species.  
Because every piece of wood is unique, final stain color may vary and color match is not guaranteed.

Minwax Standard Choices: <http://www.minwax.com/wood-products/stains-color-guide/>

Exterior wood option accomplished with cabinet select if stain grade cabinets are selected.

## 14 - PAINT, BAR CABINETS

Wood can vary in color and pore structure even within the same species.

**Because every piece of wood is unique, final stain color may vary and color match is not guaranteed.**

Choice	Description	Status/Alerts	Price
 <div>Install Owner Furnished Vanity, Top</div>	<div>Install Owner Furnished Vanity &amp; Top</div> <div>Note: We reserve 36" of space for the vanity. Stock tops extend over both sides of the vanity which means the vanity should not touch the wall: if it does the top is off-center by an inch or so and has a very large overhang on the exposed side. Code requires 4" clearance between the wall and the side of the vanity, if the vanity doesn't connect to the wall. This allows minimal access for paint and cleaning. That means a vanity of 32" or less would work well (generally that means a 30" stock vanity).</div> <div>Vanity tops come pre-drilled for the faucet installation. Please choose the hole pattern that matches your faucet selection.</div>	<div> Selected on Aug 31, 2025 By Cory &amp; Marissa</div> 	-\$685.00

Knowing your vanity size prior to us roughing in the plumbing allows us to get the water supplies and drain stubbed in accurately. Please share that with us as soon as possible

<div><div></div><div>Floor Preparation - LVT - Grind, Float, &amp; Feather</div></div>	<div>Subfloor Assessment &amp; Preparation for Your Concrete Subfloor:</div> <div>At the time your project was measured for flooring, the concrete subfloor was assessed by our flooring professional, which has led to the adjustments and charges detailed in this change order. Our goal is to ensure the longevity and long-lasting beauty and performance of your flooring, whether it's LVT or carpet.</div> <div>LVT:</div>	<div> Unreleased</div>	\$0.00

It's worth noting that while we aim for flatness, the floor may not achieve perfect levelness, but it will meet the essential 'planeness' standards for your LVT project. This process also includes proper sealing and priming, ensuring excellent adhesion for both tile and glue-down installations, where applicable. It's worth noting that while we aim for flatness, the floor may not achieve perfect levelness, but it will meet the essential 'planeness' standards for your LVT project. This process also includes proper sealing and priming, ensuring excellent adhesion for both tile and glue-down installations, where applicable.

Carpet:

The process involves addressing subfloor issues, such as grinding down high spots, filling in low areas, and feathering filler, as necessary, to achieve the desired look and performance, minimizing future wear patterns. The outcome will be a subfloor that meets the necessary 'planeness' standards for your specific carpet project, ensuring a smooth and lasting carpet installation and minimizes gaps between the bottom of the baseboard and the top of the carpet created by a wavy subfloor.
